

3-251P81

THE DIAL SYSTEM - - Youthful inventor
demonstrates wireless control of model
boat at Denver.

-Colorado.U.S.A.-

Picture.:- Another invention along the--
--lines of steering a ship by wireless waves. This--
--time, the course is governed by--
--a systel of dialling like our automatic telephones.

Such experiments as these may foreshadow more
modern miracles,--

--whengreat cargo ships will put out from port--
--with a robot captain and a crew--
--of switches and batteries. When a shipment -
--of fuf coats for Iceland turns up in Africa, the
old gag will be cracked - - "Sorriry, you've been
troubled".
