MONSTER'S NEW HOME - - Great hangar to house
the mighty U.S. airship "Macon" nearing completion,
at Sunnyvale.

-California-

Picture:- This is to be the home for America's new--

--monster airship "Macon". The--

--dirigible is nearly completed,--

--so her one-room bungalow--

--is being made ready for her. Eighty-five hundred
tons of steel have been used to--

--make the frame-work alone; the doors weigh two thousand
tons.

By the time this is fit for occupation, the American
Navy department will have spent five million dollars just
for a parking place for the ship. It has given nearly a
year's--

--work and wages to five--

--hundred men. That's the best thing about it !
