

SOMETHING NEW ! - - Brain-children of clever
people who have invented novel 'gadgets' for the
benefit of mankind.

Picture:- Here is some 'hot' news for the modern
girl, and ultra-modern boy, perhaps ! A rubber
affair like a double bathing cap--

--is filled with hot water. Hair waves are set
with slides, or whatever you call them, and the
hot water cap put over the lot. Cook for ten
minutes, and serve with, - - sorry ! - -

After ten minutes remove cap and - - There!
Isn't that just too intriguing ?

This is a counter move to car bandits !
When you leave your car in the--

--street, a self-locking roll shutter is pulled
across the wind-screen. No-one--

--can drive a car without looking where he is
steering except the--

--novice who bought his yesterday. With --

--this invention your car cannot be--

--er - - pinched, although you may be for parking
it there !
