

UP FROM THE FARM - - Dairy maids and men come
to town to display their abilities at the "curtain-raiser
to new era of farming prosperity" - - the Dairy Show.

-Islington-

Picture.:- Despite agricultural jeremiads, this year's
Dairy Show entries have exceeded all expectations. Sweeping
inovations in production--

--methods and improved distribution have brought greater--
--prosperity to farming. Goat's Milk is becoming popular,--
--but the cows are not jealous about that. In any argument,
they know the last bucket will be theirs !!

The Show program of continuous variety includes 264
milkings daily, but let--

--me warn you, there are no milkmaids--

--going a-milking this year. All the milk maids--

--in the show are men. No, I don't--

--know why ! Did you know that milk was--

--weighed, not measured ! Neither did I until to-day, but
there it is !

Most operations are mechanized, but not all. Churning
locks--

--easy, but I am told there is an art in turning--

--those handles and it's not for me to contradict the sturdy
white-smocked dairy maids,--

--especially when there seems to be hundreds of them about.

What a nice little - - er - - pat of butter !

Dairy farming has a bright future and- - excuse me - -
I have a slight thirst. A glass of milk, please !

GOOD HEALTH AND GOODBYE EVERYBODY !
