"PONTOON HYDROPLANE" - - Novel "boat" gives  
surprising exhibition during first public tests,  
at Milford, Conn.

-U.S.A.-

---

Picture:- Here's good news ! A motor boat which simply--

--cannot capsize, even if it is--

--cornering at a hair-pin buoy ! It is fitted--

--with two adjustable floats which give the effect of a  
banking surface when turning. Furthermore the floats  
absorb wave--

--shock in rough weather and protect the boat from  
damage. On a straight run it can make a pivotal turn  
on its own axis without danger--

--to pilot or craft. It has been invented by Thomas  
Edison Lake. That name should guarantee the goods !
