CAR PARK OF THE FUTURE - - Chicago garage-owner
introduces novel means of solving car-parking problem of
big cities.

-U.S.A.-

Picture:- Here is the car-parking problem solved &
Drive in, press--

--the button, and a--
--sort of big wheel does the rest ! Forty-eight--
--cars garaged in the--
--floor space which six would fill normally. A kind--
--of automobile cafeteria ! No car--
--is touched except by the owner. No chance to blame--
--anyone but yourself--
--for that bent wing, or twisted bumper. When you want
your--
--car, all you do is, push a button,--
--and wait while the cage travels down to--
--you at one--
--hundred feet a minute. You then pay the--
--bill and drive away. There's a--
--chance for someone with capital !
