

SOMETHING NEW (Series II) - - Brain-children
of clever people who have invented novel "gadgets"
for the benefit of mankind.

Picture:- Rain drops running down the neck are not
pleasant. Everybody agreed on that ? Good ! Here's
an umbrella which does away with--

--spinal rivulets. Rather lop-sided to look at, but
it has the advantage of keeping the sheltered one in a
central position under it. Two can shelter nearly as
well as one, provided they stick together - - so we
must stick together !

Here is another invention to avoid getting drowned !
No matter what soup--

--you find yourself in you--

--can float home to face it out with the family. Before
getting blown--

--up metaphorically, you blow yourself up literally.
With a bathing costume like this, a pretty girl may
get into difficulties while bathing,--

--and wait in perfect safety for a hero to rescue
her. Useful, and attractive !
