THE EARTH TREMBLED - - Second earthquake in a year  
creates havoc in rebuilt New Zealand town.

-Wairoa-

-X-

Picture:- This happened only a few days after the people of Wairoa, New Zealand, had finished rebuilding their town after last year's earthquake. One minute, a reconstructed town to be proud--

--of, and the next a shocking ruin like this !

It took just 90 seconds to accomplish this havoc--

--and destruction. It was lucky that almost everyone--

--was at home in bed, otherwise the death--

--roll would have been colossal. It's amazing--

--that when the next morning broke over this disaster--

--a committee of townspeople was called together and they just--

--passed a resolution to start all over--

--again the same day. An example of--

--fortitude which is hard to equal. There will be--

--no unemployment in that town for a few years !
