

C-151/81

WAR ON STARFISH - - State of Massachusetts
endeavours to save declining industry by making
the sea "safe for scallops".

-U.S.A.-

Picture.:- The star of the starfish has begun to--

--set. They developed a greedy taste for scallops, and this--

--has proved their undoing.

You see the scallop's place is on the menu, not locked
in the arms of the starfish. So the scallop industry
puts the starfish--

--on the spot. Four towns live almost entirely by
catching scallops and the--

--plague of starfish has nearly--

--ruined them. The government has actually put a
price on the destroyers' heads. Fishermen get--

--paid for starfish scalps. Seven pounds--

--a bushel. Starfish, or scallop, it pays !
