

THE FLEET'S IN - - Mighty ships of our Navy  
return to the Firth of Forth after autumn manoeuvres  
in the North Sea.

-Scotland-

---

Picture.:- Ships of the Fleet, having roamed the North  
Sea for a--

--few weeks of autumn manoeuvres, return to the Firth  
of Forth. "Warspite", twenty-seven thousand tons, steams--

--majestically towards Rosyth. "Renown" follows her.  
The main armament of these ships is 15" guns .

"Warspite" has eight - - "Renown" only six !  
Someone has seriously suggested that as it is un-  
likely the guns will--

--be required for years, and years, and years, they  
should be replaced by wooden--

--models. The Lower Deck's reply to the suggestion  
is unfit for--

--publication. That is the famous battle-cruiser  
"Hood", having a displacement of 41 thousand--

--tons. Fine ships ! All these will be honourably  
pensioned off when the Disarmament Question is  
settled - - when it is settled.
