ROLLING ALONG - - Parisian youngsters stage
first races on the newest "terror of the pathways" - -
the 'rolling ski'.

-France-

Picture.:- Someone has unearthed the roller skate's big
brother, and is doing--

--his best to exploit it. Parisian children are holding--

--races to set up yet another world's record, as there are
so few. The rollers are called 'rolling skis', and this
eliminating contest is run on the asphalt of the Place de
la Concorde. The youngsters take their new sport
seriously. It develops the arm muscles, but is not
recommended to adults, as it may make the knees creak.

The kiddies have all the fun !
