

C-105951

WASHINGTON DAY IN WASHINGTON -- The
Capitol "goes wet" in anticipation of opening of
the new Congress in December.

-U.S.A.-

Picture:- The long-standing rumour that America--
--was 'dry' is--
--at last entirely--
--dispelled. The disclaimer comes direct--
--from the Capitol--
--at Washington which--
--to-day registers one of the wettest--
--days in its history. It--
--is the first move in--
--the battle against smut. The City was--
--tired of it, and wanted to--
--be clean. The firemen were called out--
--a barrage of legal liquid was--
--directed against the Government buildings, and--
--a severe wash-and-brush-up administered.

Washington is now clean and satisfied !
