"LAYING THE CARPET" - - Thousands of new turves are being laid at Wembley Stadium in preparation for the 1933 F.A. Cup Final.

-Middlesex-

Picture:- These men are laying one of the largest--
--carpets ever. Wembley Stadium, after being used for a Speedway Track is now--

--getting ready for the Cup Final. Several hundred tons of cinders have been removed and the--

--burnt-out dust is being replaced with something alive and growing. There must be--

--nothing dead about the Cup Final. Thousands of green turves, all cut--

--to an exact size will soon make a--

--fit ground for Finalist heroes to play on. This work of making the green grass grow all round requires several months of expert care. If it were--

--not given plenty of time to settle, Alex James might find himself scoring a goal with a divot. Well,--

--April won't be long now ! Where are you going to sit ? - - Or GRAND STAND ?
