

FREE FUEL -- Needy people of Chicago welcome local authority's offer of wood blocks 'for the taking away'.

-U.S.A.-

Picture:- Here is another idea for winter work, offered--
--by UNIVERSAL NEWS, free, gratis, and for nothing. A paved roadway was required at Chicago, but money for the job was short.

The unemployed poor of the neighbourhood were given permission to take the old wooden blocks for firewood,--

--providing they dug them themselves.. They did ! This wood. soaked forty years--

--with oil and petrol--

--from cars makes wonderful winter-fuel, and the number--

--of workers on the--

--job cleared the road in- -

--record time. So the authorities have saved money,--

--the poor people have got firewood, and the men will get employment. Everybody is satisfied.
