"VEST POCKET" PLANE - - Tiny aircraft gives entire satisfaction in first official tests, at Cincinnati.

-Ohio.U.S.A.-

---

Picture:- It's a small plane that can hide behind a motor car, but this one can !

The midget machine can be carried by two men. It weighs less than three hundred--

--weight. It looks like--

--'chick under mother's wing'. But most important--

--of all it really flies. Driven only by a thirty-five--

--horse power engine, it does thirty-six miles to a gallon and--

--moves at ninety miles an hour. It's only thirteen feet across--

--It can be folded to seven feet overall ! Seven feet ! A--

--fly baby alright !
