**AFTER THE STORM - Vast areas of the
Border Country flooded as a result of
one of the heaviest storms in recent years
- Scotland -**

Picture - Scottish weather has been taking far too many
liberties lately. Look at this lot ! Whole farmlands are --

-- under water, outbuildings undermined, and live stock in
danger. Roads are turned --

-- into rushing rivers and the people in several districts
are marooned in their houses.

Bridges have collapsed, many roads in parts are
under six feet of water. In --

-- some cases building foundations are in danger. Motor-cars
are of less use than farmcarts, ~~just~~ now.

-- just now. This old nag has no magnete to short circuit !
Gee up, old horse, this is where you smile !
