ELECTRIC WAY TO THE COAST - - Completion of
Southern Railway's £2,750,000 electrification scheme
brings Brighton within an hour's run from London !

Picture.:- Victoria Station, known all over the world,--
--gets a move-on ! A clean move ! A quiet move ! This
train--
--to Brighton robs fond parents of the chance of--
--being infantile to their off-spring about "puff-puffs" to--
--the sea-side. No smoke, little noise and lots--
--of comfort on the new electric train service. The air of--
--the Sussex Downs is left unsullied, tunnels passed without
suffocation--
--from coal engine fumes. Break-down is impossible. If one--
--current fails, another can immediately be switched on.
A few minutes over the hour from London, and you can
be--
--playing ducks and drakes on the beach,--
--or telling the tale to aquarium gold-fish. Great !
