"GOOD LUCK "BLUE BIRD" - - Sir Malcolm Campbell  
displays the re-constructed car with which he hopes to  
create a new world's land-speed record at Daytona.

-Horley, Surrey-

---

Picture. :) Queer, to see this two thousand, five  
hundred horse power monster coming out of an ordinary  
little private country-house garage. It is at the  
house of--

--Sir Malcolm Campbell at Povey Cross. Father, and  
son Donald are--

--just wondering what speed this new 'Blue Bird' will  
attain. It is one thousand horse power--

--more than the previous record-breaking model, and  
weighs four--

--and a half tons. The first 'Blue Bird' did one-  
hundred-and forty-five miles per--

--hour; the second two -hundred and fifty-four.  
Theoretically, this should top three hundred--

--miles an hour. On January 18th, it leaves for  
Daytona Beach, and on February 7th, Sir Malcolm  
Campbell hopes to make an attempt on the record.  
A hazardous experiment requiring courage and--

--resource. We all wish the 'Blue Bird' good  
speeding, Sir Malcolm !
