CITY OF LIGHT - - New York makes a magnificent after-sunset spectacle; a brilliant answer to French charge of "brutality in lighting".

-U.S.A.-

---

Picture.:- New York is sore ! These pictures are its--  
--'kick-back' at the Chief Engineer of Paris,--  
    When he paid Manhattan a visit--  
--he said the lighting was brutal. Well,--  
--judge for yourself ! Look at the famous Chrysler spire,--  
--the new Waldorf Astoria, and look especially at the--  
--Empire State Building, the world's highest erection,--  
--thrusting its tower into the very--  
--heavens. From its almost celestial height, the whole of--  
--America's glittering metropolis can--  
--be seen spread out like--  
--a carpet of brilliants. Streets and avenues run over--  
--it like strings of bright beads. America wantsto --  
--know if Paris can show anything to equal--  
--this. Anyway, that what's the Frenchman calls 'brutal'.  
What do you--  
--think ? Perhaps he's super-artistic, or jealous ! Well,  
it's a private--  
--fight, but that view of New York Harbour doesn't look  
too brutal, does it ?
