A .GREAT COME-DOWN ! Mighty chimney-stack
brought to earth to make way for colliery
improvements at Skelmersdale.

-Lancashire-

Picture.:- Twelve-hundred tons of chimney come down !
It has taken a leaning towards drink. The safety of
the village-inn just--

--below it is threatened. The Landlord clears out in
case the chimney should drop in.

One-hundred-and-eighty feet of danger ! And
its place is required for colliery--

--improvements. To make it fall clear of buildings,
steeple-jacks enlarge a hole where the rats have been
at it,--

--and it wilts.

(EFFECTS).

Spectators can see the top of the chimney--

--for the first time at close quarters. Slightly
damaged, but one can't have it all ways. The steeple-
jacks finish--

--with a soft drink on a hard seat.
