

2-1945 P. 21

MINATURE MARVELS - Mr. Douglas of  
Castleton permits us to peep at his  
handiwork - "the smallest of everything".  
- Derbyshire -

---

Picture:- Everybody today boasts of building the biggest  
something or other. Mr. --

-- Douglas starts a different vogue and does just the opposite.  
Here --

-- is the smallest safe in the world. A perfect model with  
eight locking bolts but it's too small to hold a postage stamp.

The smallest electric motor. Every part and detail is  
exact and it can easily stand under a small thimble !

Ann Hathaway's cottage is a marvel of minuteness and  
accuracy. Its Mr. Douglas's hobby to --

-- reduce all sorts of things to microscopic dimensions. He  
should be an Income Tax Assessor !
