

150525-2

SOMETHING NEW (Number Eleven) - An idea,
introduced at the Building Centre, for the
benefit of work-people at 'knocking-off' time.

-London-

Picture:- Work people will lose one of the joys of
life fighting for the best place at the tap if--

--this invention is universally adopted. It supplies
hot, cold--

--and tepid water in bulk with--

--lots of room for everyone. The use of liquid washing
fluid makes it unnecessary--

--to dive for the soap when the other fellow carelessly
drops it in--

--the tub. The invention also saves waiting for one's
turn at the tap,--

--and thus adds some minutes to--

--employees' leisure. Everyone finished? Off with
the water. A clever idea - - and clean!
