A "BLOW" FOR UNCLE SAM ! - Blizzard strikes vast area of United States bringing biggest downfall of snow for years.

-U.S.A.-

Picture:- "Old Man Winter" is doing his job rather well this year. He gives the City of Washington--

--something to think about. The traffic'cop' coins a--
--few new words to fit the occasion. Street cars get snow--
--bound, and shanks' pony makes better speed than--
--the millionaire's luxury car.

The heavy fall--

--gives America a chance to inaugurate--
--another of those sweeping reforms. Unemployed get a spot of work,--
--and the new snow plough makes one of the--
--hits of its career and works--
--overtime everywhere. Twenty--
--four hours after the blizzard, many of the main roads are clear again, hundreds of tons of--
--snow having been blown into banks on the road sides. If one--
--can keep warm and forget the inconvenience,--
--there's lots of beauty to charm the eye, but if your eye is on an order waiting --
--in the next city, both are apt to be missed. It looks all very fine and large now, but for people who have to walk this road when the thaw comes along, I should recommend boat transport.
