EXPRESS DELIVERY - - Propeller-driven sled
ensures prompt delivery of mails to isolated parts
of the Colorado Mountains.

-U.S.A.-

Picture.:- A new kind of air-mail operates among the
snows of the Colorado Mountains.

A few years ago, the Christmas Mail was guaranteed
to arrive in time for Easter, but with this aeroplane
engine on a snow-sled, the postman has adopted the milkshop
slogan of 'Families--

--Supplied Daily !' No matter how deep the snow drifts may--

--be, this mail van will skid over them at anything--

--up to ninety miles an hour. The driver also acts as
parcel carrier--

--from one neighbour to the next - - when there is--

--a parcel, and when there is a neighbour !
