AFTER THE EXAM - - Students of the French National School of Fine Arts celebrate completion of the year's most important examination.

-Paris-

---

Picture. :- Students are much the same the world over ! Coming architects of France celebrate the fact that their big examination is over. The Rougevin Contest in decoration at the Ecole des Beaux-Arts has an important effect on an artist's--

--career. But for to-night that's forgotten, and the--  
--students assemble in a torchlight procession, and live up--

--to the theory that to-morrow never comes. Satirical models--

--of the examination subjects are paraded through the--  
--streets until they arrive at the famous Pantheon.

Here various cars, effigies and models are--  
--made light of by the simple process of--  
--applying a torch and burning--

--them. Somewhere among these madcap--

--students are those destined to be the foremost decorative artists and architects of France.
