A "QUEEN" OF THE OCEAN - - Britain's newest luxury liner, "Queen of Bermuda", leaves Birkenhead for final trials.

-Cheshire-

---

Picture:- The new "QUEEN OF BERMUDA", a twenty-two thousand tons liner replaces her name-sake which was destroyed by fire at Belfast sixteen months ago. She--

--incorporates the latest fireproof devices. Steel replaces wood wherever possible--

--and the holds are fitted with smoke detectors which ring--

--bells. When a cabin temperature rises above a certain--

--point, a red light shows on the Captain's bridge,--

--and gives warning. If a fire-proof vessel is attainable,--

--the "QUEEN OF BERMUDA" is it !
