KING CARNIVAL ARRIVES - - Amazing 'floats'
and figures in annual parade at Viareggio.

-Italy-

Picture:- The little winter resort of Viareggio shows what it can do in the way of Carnival. The floats are magnificent. All sorts of birds on this one, and--

--on the next wierd and wonderful beats which never roamed in primeval forests. Viareggio --

--was once a malarial swamp, but good drainage has turned it--

--into a health spa. There's a nice fellow, with lovely cardboard teeth. Twelve months, and lots of money have been spent on these figures. After this show--

--all will be dismantled, and a new lot commenced. It's a high spot--

--of the season. That float should be called the ever-open door. Looks like a day-time nightmare, but it's real! Just continental King Carnival!
