

AWFUL ACTIVITY - - Populace for miles around  
seized with panic as Vesuvius breaks into eruption.

-Italy-

---

Picture:- More terror for the Italian peasants living on,  
or--

--near, the slopes of Mount Vesuvius. The coming to life of--

--this subterranean fire monster, with its terrifying  
rumblings is--

--a fearful warning of imminent disaster to nearby towns.

The inhabitants leave their houses, and flee in  
panic to the open plains out of the range of the molten  
lava, and--

--flying red hot cinders. Meanwhile the Italian  
Government takes every precaution against loss of life.  
The devastation--

--a volcano can cause is colossal. Even when the  
fiery lava --

--doesn't reach the villages, the earth tremors  
as the volcano belches out its--

--volcanic, splits houses asunder and buries beneath their  
ruins--

--the unfortunate people who are without sufficient  
warning to get out of the towns--

--in time. Man has no power to muzzle  
an erupting volcano.
