STOP ! LOOK ! LISTEN !!! Numerous accidents
to children inspire school authorities to introduce
"road sense" lessons for the Kiddies.

-Erith.Kent-

Picture.:- During last July and August, two-hundred
children were killed in road accidents. To lessen--

--this dreadful toll of child life, instruction is
now being given to--

--school children in "Safety First" behaviour. "Look
right and left before crossing the road" is--

--one piece of simple but sensible advice. Street scenes
are--

--staged in playgrounds, and the kiddies are taught to
watch and--

--obey the traffic police. The--

--child with the honour of policeman thrust upon
him, per a label round the neck, holds up the
traffic and the scholars pass in safety. After--

--that they are coached in the real thing. Real
policemen and--

--real traffic. Wait for it ! On the Command--

--One, making a wave from the Robert's hand, they
cross, having learned their lesson. At a London
Congress next May, "Safety First" training and
research reports are to be submitted to the authorities.
