FLOATING AERODROME - - Privileged visit to the  
"Lexington", the mighty mother-ship of a hundred  
aeroplanes of Uncle Sam's navy.

-Honolulu-

---

Picture.:- Special pictures of America's latest and  
most wonderful aeroplane-carrier "Lexington". One  
hundred--

--machines can be lined up on its deck aerodrome, and  
all be launched within a few minutes. Stabilisers keep  
this amazing craft on even keel, and taking off is as  
easy as on land. Heavy seas scarcely--

--effect it. All these 'planes have just risen from  
the mother-ship for exercises,--

--and made way for this spot of--

--exercise ! These 'shots' show that the--

--deck is as big as--

--an army parade ground. It takes fifteen hundred men  
to run this floating--

--air base. To get this 'shot', our camera-man shouted  
"The drinks are on me !" - - and caused a stampede. It  
cost him a small fortune. He thought one swallow made  
a sailor's drink. It doesn't !
