MASKED LADIES - - Young ladies of Leeds University practice to "foil" attacks on their reputation as skilled fencers.

-Yorkshire-

---

Picture:- Keep your seats, please ! It's the cameraman they're after ! He got rather fresh,--

--and in argument these ladies, unlike most of their sex, can keep to the point. These trim exponents of the art of--

--fence, are students of Leeds University. The Leeds team was to have meet the Sheffield--

--University team in mortal combat, but the match was rather suddenly cancelled, so we persuaded the Leeds--

--ladies to show what the Sheffield team would have--

--had to face. Fencing, with its--

--lunging and thrusting to carte and tierce, its lightning parrying, and training--

--in perfectly balanced movement is a wonderful sport for developing grace and for slimming if you are--

--on the heavy side. Thank you ladies, and good luck--

--in all your engagements, but always keep your guard up !
