Picture.:-

This is a German battleship which got on the wrong side of the British Navy and has been wrong side up ever since. The Prinz Regent Luitpold is made of--

--stubborn metal, but when a brawny Scots sledge hammer expert gets busy, the sledge hammer wins.

This unusual 'shot' was taken from a sixty-foot crane which gradually lowered the cameraman to the ship's level. (PAUSE).

An uplifted nose which no longer pokes into other people's business.

After fourteen years at the bottom of --

--Scapa Flow, the guns are a bit damp.

But the electric steel cutter soon remedies that. Hundreds of thousands of pounds--

--were spent in making this war material. Now it is of less--

--value than an old iron bedstead, and not so useful,
