

2 P22081

THE FIFTH WHEEL - Novel addition to
motor-car solves the problem of parking
by the roadside.

-U.S.A-

Picture: The spare wheel on this car is not--

--spare at all. The--

--gadget on the dash-board makes it do -- this. PAUSE.

For driving into the spacious drive supplied with small
but desirable villas (write for illustrated booklet) --

--this invention should be a boon. For crowded parking places too.
See how it protects the other fellow's car from your rotten--

--reversing and wriggling about. Its a great idea. The fellow
I usually park--

--next to ought to buy one for me. It would save him money !
