

2-85JPN

THE WOOD NYMPHS - Dainty damsels of
Edinburgh present a charming summer idyll
in Barnston Woods.
- Scotland -

Picture: As against the often criticised set faces and general
immobility of modern ballroom dancers, take--

--a look at this. Young nymphs dancing through--

--the fields and woods, full of the joys of spring. PAUSE.

Looks like an incantation to conjure a handsome young Adonis--

--to appear in the centre of the circle and who could blame him if--

--he did. Apart from this attractive display, there is nothing
ethereal about these girls of Edinburgh. They are just searching
for and finding a means to express those aesthetic impulses which
throb in--

--the heart of every normal daughter of Eve. In--

--the exercise they also gather an abundance of health and develop
an appreciation of the physical beauties of Mother Earth and her
children.

So if you happen to be near Barnston Woods, Edinburgh any
fine day, take a tramp through them--

Let it be a nice tramp, and a vision of real pixies may
reward you !
