Picture.:-

A million or so years ago things like these  
roamed round our little old world. When a child--

--disappeared mysteriously and any of these beasts  
was seen licking its chops and smiling--

--a well-fed smile, Father and Mother nashed--

--their teeth and went back to their cave. Great  
hairy mammoths like this--

--probably ambled through the forests of Westminster  
or sogged over the Margate marshes.

Not a dope-fiend's dream, but--

--a show of prehistoric animals at the World's--

--Fair at Chicago. A bob-tailed baboon.  
Hence the remark - - 'Bob's your Uncle'.
