P H E W ! Bears and belles of U.S.A. manage to keep cool despite terrific heat wave.

-Washington-

Picture.:-

While ladies are adopting bare-legged fashions, these polar-bears prefer--

--to be 'hosed'. Sorry ! It's the summer heat !
The bears are--

--suffering too, so the--

--keepers continually squirt cold water over them.

They would give all the buns --

--for a nice large ice-berg, and speaking--

--of ice-bergs, be seated ladies !

American girls sit on slabs of ice--

--to keep cool. It's very--

--effective. It reverses the--

--usual order of things and sends cold shivers--

--up the spine.

It has also caused many a man--

--to be jilted because his girl--

--had cooled off. Although--

--maybe he got her thawed later. Better later than never !
