LEARNING TO FLY & Captive aeroplane enables  
would-be aviators to gain 'air sense' without leaving the  
ground !

-Hounslow-

---

Picture:- The human flying fledgling ! Air-shy grown-  
ups, who wish to use the wings science and engineering  
has--

--given them, get instruction by captive aeroplane. It  
does--

--everything except fly. Swinging the prop is one  
essential. Then--

--contact ! Switch on ! (EFFECTS).

(EFFECTS - 4 SHOTS).

A test for air sickness !

This is the view if you are not too ill to look !

A flat spin ! The real thing may mean anything from  
a lucky recovery to an obituary notice,--

--but the fledgling thinks its fun ! A lesson or two  
more and she will be careering above the clouds. She may  
be a future Amy Mollison ! May be ! Perhaps ! Possibly !  
Well, it's a lofty ideal ! From earth to the fame of stardom !
