

THE ALBURN DAM - - Official inauguration of scheme to provide Wakefield and district with $2\frac{1}{2}$ -million gallons of additional water per day.

-Yorkshire-

Picture:-

While the country is almost at its wits end for--
--water, this huge scheme to provide a big area--
--with an extra two-and-a-half million gallons--
--a day comes as a "refresher" on a big scale !
A switch is clicked over and--
--the vast one-million-pound scheme is inaugurated. ...
The reservoir--
--to hold the water consists of over a-hundred-thousand
tons of concrete,--
--while the whole thing has taken over four years to
build.
(BRING UP WATER EFFECTS TO END OF SHOT).
(CONTINUE WATER EFFECTS OVER "FALLS" SHOT).
Yorkshire people will no longer say they
"don't care a - - - bit !".
