## BABIES' DAY AT TOOTING.

Picture.:- Three-hundred very young offspring all in one room! My hat! Some of these mothers may not go out to work, but by jingo,--

--they are anything, but unemployed. In fact this is one department of national production which keeps going.

And quite frequently the output has been supprisingly doubled - - a happening--

--which has usually caused hoots of mirth at the proud father's office,--

--and no little overtime work on very tiny garments at home.

A double event is always difficult to anticipate,--

--and when it comes off! Oh mama! Delight makes one just dizzy!

Proving, of course, that it's love that makes the world go round.
