Picture.:-

Britain's largest motor-liner for coastal work  
waits to be baptised--

--and launched. Lady Reid is--

--mistress of the baptism ceremony. Crash goes the  
bottle and--

--the propeller quivers with wine and emotion. But--

--the wind makes launching dangerous, so--

--two days later the story is resumed.

The officials meet again. The last block is knocked--

--off and away she goes ! (EFFECT). The launching of this  
ship is directly due to the removal of tax from oil fuel.  
When they remove the income tax, we will launch something !
