"BACK TO THE WALL"

Picture.:-

The only way to see the famous Eton Wall Game properly is to balance yourself on the top--

--of a 12-foot wall, and not get excited. If you fall off and get mistaken for a player, well, anything may happen.

One player thinks he will go home. I am sorry I can't explain this game--

--to you, but no-one seems to know the rules. - - Why it is played, what it is about, or when to blow the whistle. Oh ! One fact emerges. That the last goal was scored in 18--

--85. First of all I thought the object--

--was to push the wall down, but it's a ball game, as well as a wall game ! Some-one told me it was a very old game. That may account for the lack of information. The last--

--people who knew the proper rules have died, and taken the recipe - - er - - the secret - - with them. A pity ! It looks as if it might be such a clever game !
