SHIP ON A ROOF.

Picture.:-

A ship on a roof in the centre--
--of London. Up goes the flag to--
--show that the ship is in commission, so--
--to speak. And then the work starts. It's a--
--training ground(or roof) for boys who--
--wish to follow the sea as a career. Developing--
--physique takes an important place in the curriculum--
--and a few hard knocks sometimes help to--
--shape a chap, broadens his nose, and does him swell.

Here is some signalling practice. Man-power
wireless ! Flagging--
--messages across space. Not so fast--
--as radio maybe, but it's quite speedy ! Listen and
watch this !

U N I V E R S A L N E W S .

And now up aloft to 'splice the--
--main brace', or 'belay', or 'heave-ho' ! No, not
'heave--
--ho'. A dryland ship doesn't encourage behaviour like
that !
