FISHERS' "GENERAL POST"

Picture.:-

The Yorkshire Fishery Board does a noble work in the cause of truth, as this--

--story will show. Fish are--

--being netted from this stocked pond for--

--transportation to Yorkshire rivers and canals, chiefly the Ouse--

--and Derwent. This gives anglers a chance to catch and take home real fish, instead of just a fish story. Of course even if you took that one home, some wives would swear--

--you had bought it from the boy fishing with a string--

--and bent pin. For scientific purposes a numbered disc--

--is attached to the various fish which are then released and (aint he pleased?) These marked fish are--

--frequently caught years after, miles from where they were dropped,--

--and provide evidence of piscatorial, migratory, habits. Oh heck!
