SEAL "SHOOTING!"

Picture.:-

So this is England ! You will hardly believe--
--it. After this, the cameraman didn't care much where
it was.

A breeding ground of grey seals just off the coast
of Northumberland.

It's the first time they have seen a movie camera,--
--and they don't like it. This nervous--

--mother flops away, leaving her baby daughter to her
fate. Ah ! Would you, you nasty little beast.

A ton of seal meat. No wonder he gets tired,
hopping around.

The young ones are given a little encouragement
learning how to climb rocks before taking to the sea.
Only in mid-winter do these seals come ashore.

And Greta Garbo plaintively asks why people
want to look at her, anyway.
