MADE IN ENGLAND.

RAILWAY TRAINS FOR BRAZIL.
BY SEA TO SOUTH AMERICA.
-Liverpool-

Picture.:- A wholesale order ! Just a few nice new trains for--
--Brazil. To get them from Birmingham to Liverpool for
shipment,--
--thirty signals on the journey between Liverpool and Crewe--
--had to be dismantled. Now the 'Belpamela' is--
--receiving them into her care for transportation across the
Atlantic. The locomotives and coaches complete an extensive
rolling stock--
--order for the San Paulo Railway, at Brazil.

Very careful packing is essential. If one of these
steel monsters were loose in a heavy sea, it would--

--act like an internal battering ram. Well, that's
another order for John Bull's goods. Next please !
