

NEWS IN BRIEF.

(1). Picture:- Glasgow's smallest house - - 12 feet by 10, and ^{18 1/2 ft} and ^{8 1/2 ft}
--less than 6 feet high, is to go. The difficulty is--
--to find accommodation for a family which apparently includes
a horse which sleeps in.

(2). Picture:- For a nationality mix-up, --
--this clown, Denaro, takes the biscuit. In fact takes the
whole tin. Born in--
--Czecho-Slovakia, mother French, Father Hungarian, a grand-
mother Italian, a grand father--
--English, a brother who was born in Holland, another in
Hungary, another in Manchester, and a sister in Bavaria,
and that's all I have got time for.

(3). Picture:- Oklahoma City is threatened by fire. A mysterious--
--explosion, and an oil well gushes out not oil, but fire and
devastation. Fire-fighters are held up by the--
--intense heat. Huge store tanks are--
--menaced. Heat resisting screens are brought into
service,--
--behind which the firemen wage the battle.

And here's nature's contrast. The Delaware river--
--gets the worst ice jam for years. It looks--
--like a plain of jagged white rocks.

^{It}
It has crushed boats to matchwood and its colossal
weight threatens--
--even the river bridges. Will they stand the strain?
