GIANT WAREHOUSE CRASH.

TRAGIC DISASTER IN HULL.
WORKERS TRAPPED UNDER DEBRIS.

-Yorkshire-

Picture. :-

A few hours ago this mass of wreckage and ruin was a five-storey--

--building. The warehouse was used for storing grain. It was well filled, when, without warning it--

--split in all directions, and collapsed. Ten men were in the place. Four were injured--

--and escaped death. The bodies of the--

--other six are buried somewhere beneath the debris. Road-workers are feverishly--

--digging in the hope that under the thousands--

--of tons of wreckage, some of the unfortunate victims may even get be discovered alive.
