

SCHOOL FOR SKI-ERS.

EXHILARATING "RUNS".
GIRLS AS KEEN AS MEN.

-Germany-

Picture:- The mountains and valleys of Switzerland are now class-rooms--

--as well as playgrounds. The train carrying the pupils--

to the summit has arrived, but they have a short climb to cover before starting their school lessons. It's a--

--class for ski-ers, ski-ers, or what-nots, and is--

--led by a well-known Alpine expert. The starting is easier--

--than the stopping in a game like this. They're doing well. Ah! A young man takes the wrong turning, but the rest can't stop to help, even if they wanted to, which they probably don't. Here are some--

--of the nearly finished pupils. I don't mean - - er - - well, it--

--doesn't matter anyway. The girls are--

--doing very well. I suppose--

--they fall softer, or bounce better or something.

Still 'she's will be ski-ers. On present form they're--

--faster than the men, and in open competitive clash, the male hopes may be bumped 'ski' high.
