MANOEUVRES IN THE MOUNTAINS.

Picture.:-

However big the German Army is, or isn't, (which is none--

--of my business), here is some of it ! Snow-shoes are --

--worn, as a protection against cold feet, I suppose. And the troops march away on skis.

These operations are carried out on--

--Mount Kreuzeck, in the Bavarian Alps, at a height of over 4,500 feet.

A wire cable will--

--shortly be used to haul gun parts into--

--position for assembling, and there is some of the--

--modern product of the Essen--

--Works which made such an unearthly din--

--in the world some memorable years ago. First spot your foe, and--

--then blow him up, and merrily off we go !
