

A BOY SAMSON.

14-YEAR-OLD STRONG "MAN".
LIFTING A WEIGHT OFF FATHER'S MIND.
-Wokingham-

Picture.:-

John Herbert Mann, fourteen-years old, is a strong--
--son of a strong family. In fact Johnnie claims to be the--
--strongest boy of his age in Britain. The family hasn't
been doing too well lately, and the other--
--morning an offer of twenty-pounds a week came for--

--Johnnie to appear with a circus. He thought he had
rather support the family that way. Twenty-pounds
a week ! Things looked good !

If he could hold fifty-six pounds with his teeth,
he could easily hold that job. But the education
authorities had to say no. He must finish his--

--schooling first. So Johnnie is keeping the family fit
and waiting until he can later keep them fat.
